## "Planet of the Apes" Genesis 1:27

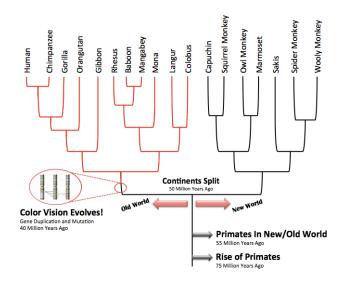

New Evolutionary Tree =

Session 6

Scientific fallacy -

Lucy – <u>https://www.youtube.com/watch?v=SyZ0Tgpp1Cw</u>; multiple bone fragments scattered over an entire area. Proven to be an extinct monkey. Bones were actually ground down to fit (physically and scientifically).

Piltdown Man – outright fraud; orangutan fragments

Nebraska Man – (from one molar) – turned out to be an extinct pig

Neanderthal Man – a man; not an ape-man; "of the same kind;" DNA samples have been found in living humans in Borneo, Indonesia, and the Philippines.

To give credit – these were debunked by "evolutionary scientists." However, this

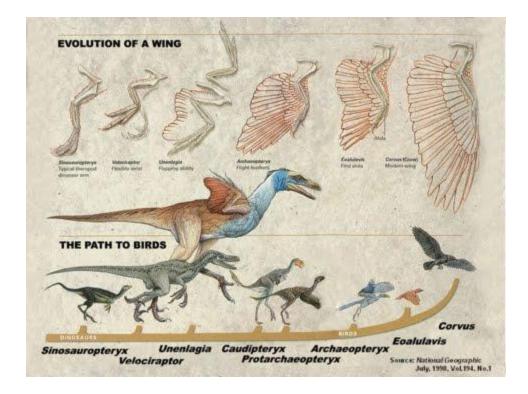

illuminates that the evolutionary community has yet to establish any

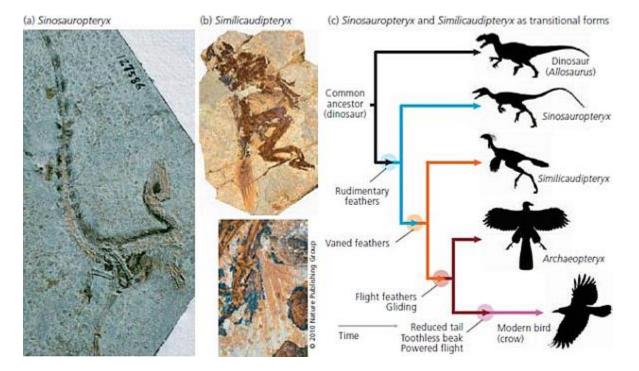

\_\_\_\_\_evidence for the evolutionary transition of ape to man.

There are \_\_\_\_\_\_ transitional forms where one kind becomes another kind.

Evolutionists still claim that they have several transitional fossils, i.e., a bird turning

into an animal or vice versa, but they are simply a different species of the same kind.

DNA, RNA, and the field of genetics, especially genetic

\_\_\_\_\_\_and mutation has forced the evolutionist to come up with a different "theory" of origin. Common traits do not give evidence of genetic relationship. For example, possums have opposable thumbs but no one would suggest that we evolved from possums. This issue is not how many things do we have in \_\_\_\_\_\_, but what makes us \_\_\_\_\_\_. The differences in biological make-up are so distinct and many that you cannot make the connection between the ape "kind" and human "kind."

There is another level of genetic entropy that affects us as a population. Because mutations arise in all of our cells, including our reproductive cells, we pass many of our new mutations to our children. So, mutations continuously \_\_\_\_\_\_\_ in the population – with each generation being more mutant than the last. So not only do we undergo genetic \_\_\_\_\_\_ personally, we also are undergoing genetic degeneration as a population. This is essentially evolution

\_\_\_\_\_. We are not evolving,

we are \_\_\_\_\_.

Just think about the great civilizations of the Incas, Aztec, Egyptians, etc...knowledge \_\_\_\_\_\_ and lost.

Genesis tells us that man used to live to almost \_\_\_\_\_\_ years. The lifespan of a man in A.D. 1200 was 35. In the 1800's it was not much more – between 35 and 40. Today, it is around \_\_\_\_\_\_ primarily due to hygiene and medical advancements.

Biblical ex. of same kind but variation – Anakim, Nephalim, etc...\_\_\_\_\_ and \_\_\_\_\_\_ yet same kind.

Genesis 11 gives us the beginning of human \_\_\_\_\_\_distinction due to dominant gene variation and retention viewed not only in skin color but in bone structure and in disease potential.

Creationist/biblical view = "Then God said, 'Let us make man..."

## Image and Likeness:

•

The Greek Septuagint of Genesis 1:26 says, "And said God, 'Let us make man in our *īcona* (Heb. – *tselem*) and according to our *homoiōsin* (Heb. – *demuth*)."

What is the image of God? Humanity was designed to be a physical, temporal,

verification of the non-physical, eternal \_\_\_\_\_\_ of the person of God.

As the truth of an \_\_\_\_\_ lies in the person or thing that it

\_\_\_\_\_, so the truth of a man lies in what he represents.

Man, therefore, is not understood \_\_\_\_\_\_ but

Biblical anthropology (the biblical study of man) does not begin with

\_\_\_\_\_ (the first created person), but with an understanding of

\_\_\_\_\_, the perfect God/man, the second Adam.

The words image and likeness can be understood as:

1. Synonyms

- 2. Diminutives
- 3. Egyptian Royalty comparatives, cp. Daniel 3 and Revelation 13-16; cp also with Mt. 22:17-21 (image of Caesar on the coin)
- 4. As separate and distinct:
  - a. Image = a \_\_\_\_\_\_ state; something that does not change
  - b. Likeness = a \_\_\_\_\_/dynamic state; something that is \_\_\_\_\_.

**Point:** All humans are made in the \_\_\_\_\_\_ of God at creation; all humans have been given the potential to be his \_\_\_\_\_\_ through his grace.

The distinction will be important as we look at the Fall. What was lost when Adam and Eve sinned? Image. Likeness. Both. Neither.

## Key questions:

How does image and likeness connect to:

- 1. Self-worth Acts 17:29
- 2. Murder/Homicide Genesis 9:6
- 3. Work Genesis 2:15 with John 5:17
- 4. Idolatry Leviticus 26:1

- 5. Lying Colossians 3:10
- 6. Jesus Colossians 1:15
- 7. Poverty/Homelessness Deut. 15:4-11
